

# FarmARMr access control system with license plate recognition by Farmgate.

**Attention chicken farmer and food producer. We know you are busy but biosecurity threats are on the rise.**

You help supply New Zealand with it's food and help keep the country fed - chicken, beef, fruit and veges. You have expensive tools, equipment, food supplies and diesel on site that you can't afford to lose and you need to track everyone who comes on site for health and safety and biosecurity.

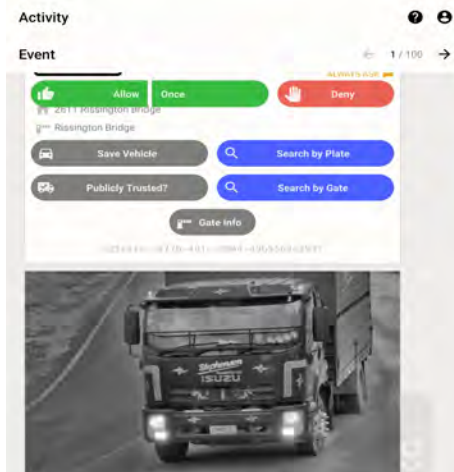

Like most food producers you know you need to improve your access control and biosecurity tracking. You may be getting pressure from authorities, industry representatives or hearing more and more news from around the world about outbreaks of avian flu and the like. You may also be thinking about the risk of cross contamination due to movement of animals or vehicles.

## Why a Farmgate FarmARMr system?

- Visibility on EVERY VEHICLE coming and going.
- Integrate with a barrier arm or gate for access control.
- Superior license plate camera with vehicle image AND vehicle plate read.
- Clear night time plate reads (most cameras can't do this).
- Automatic alerts of STOLEN vehicles.
- Mobile phone App.
- Search by date, time, plate, across one or multiple cameras.
- Edit all and name known vehicles.
- Customisable alerts -new, saved, stolen, blocked.
- Visibility & control direct on your mobile phone.
- Data may be extractable or linked to others systems such as web based search, MYOB, Reckon, Xero etc) as an add on feature.

**Get started with your access control and biosecurity solution from Farmgate today.**

# Testimonials

"We would recommend Farmgate to all poultry farmers. We can see who comes on to the property"

Chris, New Plymouth

"We have a Farmgate license plate cameras. I wouldn't be without ours now. I can see who is coming, who is going. We also get alerted if there are stolen vehicles spotted in our area"

Conrad, Waikato

"Every rural property needs this"

Murray, Auckland
